

Learning Guide: Patterns

Name

This guide goes along with the Talking Study Guides video on patterns.

- **A pattern is a design or a sequence that repeats.**
- **Number patterns are numbers that repeat in a certain sequence.**
- **Geometric patterns are designs or shapes that repeat in a certain sequence.**
- **A growing pattern is when something is consistently added when a pattern repeats.**
- **A shrinking pattern is when something is consistently removed when a pattern repeats.**
- **When solving patterns, a good strategy is to look at 2 numbers of items next to each other and note any changes.**
- **Patterns can increase, decrease, or do both. Study the entire pattern to figure out the sequence.**
